PROFILE

Senior full-stack developer and technical lead with 15+ years in software and IT — and 20+ years of work that includes founding and running my own hospitality business. I take products from an empty repository to production — architecture, backend, frontend, mobile, payments and infrastructure — and build the AI-assisted automation around them. Hands-on with PHP/Laravel, React/TypeScript, Node.js, Python, PostgreSQL, AWS, Azure, Cloudflare, Docker and Terraform. Having run a business end to end, I build with operations, customers and margins in mind. Bilingual English/Spanish, used to remote work with international teams.

SKILLS

Full-stack: PHP / Laravel / Symfony, React / Next.js, TypeScript, Node.js / Hono, Python / FastAPI, React Native / Expo, REST APIs, WordPress

Cloud & platform: AWS, Azure, Cloudflare Workers / Pages / R2, Docker, Terraform, GitHub Actions / CI/CD

Data: PostgreSQL / PostGIS, MySQL, MongoDB, SQL Server, Azure Data Factory, Databricks

AI & automation: LLM API integration, AI-assisted bots, Grounded assistants, Zapier / HubSpot / GoHighLevel, Scrapers & schedulers

Payments & integrations: Wompi, PayU, ePayco, Stripe, Webhooks & idempotency, OAuth / SSO

Systems & security: Okta, Google Workspace, MDM, RBAC / MFA, CSP / HSTS, Risk analysis

Business & operations: General management, Hotel operations, Airbnb / Booking.com, Team leadership, Brand & marketing, Administration & finance

Delivery: Swagger / OpenAPI, Technical writing, Agile / Scrum, Code review, Mentoring, Jira / Confluence / Notion

EXPERIENCE

Founder & Technical Lead — GWork Systems

2026 – Present | Medellín · Remote

- Design and build production platforms end to end: a direct-booking hospitality platform (Sedona Scapes), a real-time sports marketplace with an Android app (Cancha), a marketplace rebuild (All Bookings 2.0) and a B2B lead-intelligence engine.
- Integrated Wompi, PayU and ePayco behind provider-neutral adapters — hosted checkout, signed and deduplicated webhooks, append-only ledger and reconciliation; no card data touches the platforms.
- Run an AI-augmented delivery process: architecture decision records first, coding agents inside automated gates (types, lint, unit, DB, E2E, accessibility, CSP), human review and staged releases.

IT Manager — IT & Internal Systems — indie.io

May 2026 – Sep 2026 | Remote

- Owned internal systems and platform operations across AWS and Cloudflare: internal applications, access, DNS, Workers, infrastructure-as-code and day-to-day technical operations.
- Built AI-assisted bots and operational automations for Hive/Slack workflows, integrating LLM/API services, PostgreSQL-backed tools and serverless components for intake, task routing and access lifecycle.
- Led staged platform migrations and integrations — including community/Discord workflows and internal tooling — across sandbox, staging and production with Terraform, Docker, GitHub CI/CD, E2E validation, approval gates, audit evidence and rollback plans.

Full-Stack Developer — WordPress (Contract) — Major Media

2026 · several months | Remote · concurrent project

- Full-stack development for an agency's client sites: custom WordPress themes and plugins, integrations, performance and maintenance.

Full-Stack Developer & API Technical Writer — Fiserv

Jan 2026 – Apr 2026 | Remote

- Supported the Vision Next platform with developer-facing technical and API documentation for financial-system workflows.
- Analyzed REST APIs with Swagger/OpenAPI, documenting endpoints, authentication, request/response models, status codes and error handling.

Provisioning Manager — IT Infrastructure & Access — Steward

Nov 2023 – Nov 2025 | Remote

- Managed IT provisioning and access across Google Workspace, Okta and MDM for macOS and Windows fleets.
- Built internal React/Node.js dashboards to monitor resource allocation and supported AWS cloud infrastructure initiatives.
- Authored SOPs, trained staff and coordinated provisioning, infrastructure and access-management processes across teams.

Full-Stack Developer & Team Lead — Virtual Latinos

Jan 2025 – Jun 2025 | Remote · concurrent project

- Led full-stack delivery with React, Redux, TypeScript, Laravel and PostgreSQL for the virtual-assistant management and recruitment platform.
- Built and optimized REST APIs and automated operations through HubSpot, Zapier and GoHighLevel — lead pipelines, follow-ups, forms and calendars — reducing manual workload by 40%.
- Ran sprint planning, code reviews and mentoring; documented APIs and processes in Confluence, Swagger and Notion.

SEO Specialist & Web Developer (Contract) — U.S.-based staffing company

Jul 2024 – Oct 2024 | Remote · concurrent project

- Delivered SEO-focused WordPress and HTML/CSS/JavaScript sites with schema markup, Google Analytics, Search Console and Meta Pixel conversion tracking.
- Built custom plugins for lead automation and CRM integration, and handled server administration (cPanel, Linux), performance and production support.

IT Specialist & Developer — SouthDesk

May 2023 – Oct 2023 | Remote

- Supported business IT systems and day-to-day operations: user support, systems administration and troubleshooting.
- Built and maintained the company's responsive, conversion-focused website alongside other development tasks.

IT Specialist & Systems Integrator — Abatech

Jul 2022 – Apr 2023 | Medellín

- Managed hybrid infrastructure across Azure and on-premises servers; automated maintenance with Python and Bash.
- Led Docker containerization and CI/CD pipeline setup, and implemented cybersecurity protocols and risk assessments.

Full-Stack Developer & DBA — Freelance & contract projects

Jan 2022 – Feb 2023 | Remote · concurrent

- Adage LATAM — SQL Server development and database administration.
- All Bookings — full-stack development of the original accommodation marketplace (later rebuilt as All Bookings 2.0).
- Admin Ops — front-end and WordPress development as web team lead (adminops.com).

Software Analyst, Developer & UX Collaborator — UNIFI BPO

Oct 2021 – Jun 2022 | Medellín

- Built internal web applications with React, FastAPI and MySQL that improved process efficiency.
- Wrote technical requirements and Swagger API documentation, designed UI components with the design team in Figma and trained users on new features.

System Analyst — Solvo Global

Apr 2021 – Sep 2021 | Medellín

- Set up and supported the systems of a U.S. client starting operations in Medellín: accounts, equipment, software and bilingual day-to-day user support.

Night Manager — The Charlee Hotel

Sep 2020 – Mar 2021 | El Poblado, Medellín

- Ran overnight operations of a boutique hotel as it reopened after the lockdowns: front desk, night audit, guest service, security and the hotel's systems.

Founder & General Manager — Own hospitality business

Oct 2013 – Mar 2020 | Medellín

- Founded and ran a short-term-rental and hotel operation with seven properties: Apartahotel Santo Tomás, Hotel La Castellana, Nutibara Home, Calasanz Home, Hostería Villa Claudia, Tu Apartamento and Conquistadores Home.
- Owned the whole business: operations, staff, finance and administration, brand and marketing, and distribution on Airbnb and Booking.com.
- Built the in-house booking and property-management system (Laravel, Bootstrap, JavaScript, MySQL) and the websites with live availability; ran the servers, backups and IT.
- In parallel, delivered web projects for small businesses: WooCommerce stores, multilingual WordPress sites (WPML) and integrations with Stripe, Twilio and Firebase.

Software Developer & IT — .NET — Aerolínea de Antioquia (ADA)

Feb 2011 – Jun 2013 | Medellín

- Developed and maintained the airline's ticket and route sales system in .NET (C#) and SQL Server, and fixed back-end data inconsistencies in ticket sales.
- Integrated sales with the DMS accounting system and built internal tools for operational reporting.
- Provided IT support: user help desk, equipment installation and troubleshooting.

Systems Support — Agenciauto

Jul 2013 – Sep 2013

- IT and systems support.

Receptionist → Night Auditor → Front Desk Manager — Affinity / EE Hoteles

2005 – 2011

- Six years across the group's properties (Affinity, Alcázar de Oviedo, Rodeo, Novelty Suites), then night audit at Comfort Suites Laureles, San Joaquín, Sky Plus Best Western and Poblado Plaza.

Office Manager — New York — Two Cousins Trucking Corp.

Jan 2003 – Jun 2005

- Office administration, billing and office systems for a New York trucking company.

SELECTED PROJECTS

- **Sedona Scapes Platform:** Direct-booking platform for a vacation-rental business — reservation engine, guest portal with e-signature, PayU payments, channel sync and an MFA back office. 723 DB + 165 E2E tests.
- **Cancha:** Real-time football marketplace: Android app (Expo), Hono API on Cloudflare Workers, PostGIS discovery, Wompi split payments and a reliability score.
- **Lead Engine:** Nightly lead sourcing, headless-browser enrichment and A+ to D scoring feeding an enforced CRM pipeline for a tourism company.
- **All Bookings 2.0:** Accommodation marketplace rebuilt from no-code into a typed monorepo: multi-tenant hosts, concurrency-safe bookings, Wompi webhooks and a ledger.
- **Smart Library:** Laravel + React library system with RBAC, Google SSO, an audit trail and a grounded AI assistant — live, with CI/CD.

EDUCATION

- Technical Degree in Software Analysis and Development — CENSA, 2022
- Computer Security Technician (Risk Analysis) — Fundación Carlos Slim, 2021
