PROFILE

Senior full-stack developer and technical lead with 15+ years in software and IT — and 20+ years of work that includes founding and running my own hospitality business. I take products from an empty repository to production — architecture, backend, frontend, mobile, payments and infrastructure — and build the AI-assisted automation around them. Hands-on with PHP/Laravel, React/TypeScript, Node.js, Python, PostgreSQL, AWS, Azure, Cloudflare, Docker and Terraform. Having run a business end to end, I build with operations, customers and margins in mind. Bilingual English/Spanish, used to remote work with international teams.

SKILLS

Full-stack: PHP / Laravel / Symfony, React / Next.js, TypeScript, Node.js / Hono, Python / FastAPI, React Native / Expo, REST APIs, WordPress

Cloud & platform: AWS, Azure, Cloudflare Workers / Pages / R2, Docker, Terraform, GitHub Actions / CI/CD

Data: PostgreSQL / PostGIS, MySQL, MongoDB, SQL Server, Azure Data Factory, Databricks

AI & automation: LLM API integration, AI-assisted bots, Grounded assistants, Zapier / HubSpot / GoHighLevel, Scrapers & schedulers

Payments & integrations: Wompi, PayU, ePayco, Stripe, Webhooks & idempotency, OAuth / SSO

Systems & security: Okta, Google Workspace, MDM, RBAC / MFA, CSP / HSTS, Risk analysis

Business & operations: General management, Hotel operations, Airbnb / Booking.com, Team leadership, Brand & marketing, Administration & finance

Delivery: Swagger / OpenAPI, Technical writing, Agile / Scrum, Code review, Mentoring, Jira / Confluence / Notion

EXPERIENCE

Founder & Technical Lead — GWork Systems

2026 – Present | Medellín · Remote

- Design and build production platforms end to end: a direct-booking hospitality platform (Sedona Scapes), a real-time sports marketplace with an Android app (Cancha), a marketplace rebuild (All Bookings 2.0) and a B2B lead-intelligence engine.
- Integrated Wompi, PayU and ePayco behind provider-neutral adapters — hosted checkout, signed and deduplicated webhooks, append-only ledger and reconciliation; no card data touches the platforms.
- Run an AI-augmented delivery process: architecture decision records first, coding agents inside automated gates (types, lint, unit, DB, E2E, accessibility, CSP), human review and staged releases.

IT Manager — IT & Internal Systems — indie.io

May 2026 – Sep 2026 | Remote

- Owned internal systems and platform operations across AWS and Cloudflare: internal applications, access, DNS, Workers, infrastructure-as-code and day-to-day technical operations.
- Built AI-assisted bots and operational automations for Hive/Slack workflows, integrating LLM/API services, PostgreSQL-backed tools and serverless components for intake, task routing and access lifecycle.
- Led staged platform migrations and integrations — including community/Discord workflows and internal tooling — across sandbox, staging and production with Terraform, Docker, GitHub CI/CD, E2E validation, approval gates, audit evidence and rollback plans.

Full-Stack Developer — WordPress (Contract) — Major Media

2026 · several months | Remote · concurrent project

- Full-stack development for an agency's client sites: custom WordPress themes and plugins, integrations, performance and maintenance.

Full-Stack Developer & API Technical Writer — Fiserv

Jan 2026 – Apr 2026 | Remote

- Supported the Vision Next platform with developer-facing technical and API documentation for financial-system workflows.
- Analyzed REST APIs with Swagger/OpenAPI, documenting endpoints, authentication, request/response models, status codes and error handling.

Provisioning Manager — IT Infrastructure & Access — Steward

Nov 2023 – Nov 2025 | Remote

- Managed IT provisioning and access across Google Workspace, Okta and MDM for macOS and Windows fleets.
- Built internal React/Node.js dashboards to monitor resource allocation and supported AWS cloud infrastructure initiatives.
- Authored SOPs, trained staff and coordinated provisioning, infrastructure and access-management processes across teams.

Full-Stack Developer & Team Lead — Virtual Latinos

Jan 2025 – Jun 2025 | Remote · concurrent project

- Led full-stack delivery with React, Redux, TypeScript, Laravel and PostgreSQL for the virtual-assistant management and recruitment platform.
- Built and optimized REST APIs and automated operations through HubSpot, Zapier and GoHighLevel — lead pipelines, follow-ups, forms and calendars — reducing manual workload by 40%.
- Ran sprint planning, code reviews and mentoring; documented APIs and processes in Confluence, Swagger and Notion.

SEO Specialist & Web Developer (Contract) — U.S.-based staffing company

Jul 2024 – Oct 2024 | Remote · concurrent project

- Delivered SEO-focused WordPress and HTML/CSS/JavaScript sites with schema markup, Google Analytics, Search Console and Meta Pixel conversion tracking.
- Built custom plugins for lead automation and CRM integration, and handled server administration (cPanel, Linux), performance and production support.

IT Specialist & Developer — SouthDesk

May 2023 – Oct 2023 | Remote

- Supported business IT systems and day-to-day operations: user support, systems administration and troubleshooting.
- Built and maintained the company's responsive, conversion-focused website alongside other development tasks.

IT Specialist & Systems Integrator — Abatech

Jul 2022 – Apr 2023 | Medellín

- Managed hybrid infrastructure across Azure and on-premises servers; automated maintenance with Python and Bash.
- Led Docker containerization and CI/CD pipeline setup, and implemented cybersecurity protocols and risk assessments.

Software Analyst, Developer & UX Collaborator — UNIFI BPO

Oct 2021 – Jun 2022 | Medellín

- Built internal web applications with React, FastAPI and MySQL that improved process efficiency.
- Wrote technical requirements and Swagger API documentation, designed UI components with the design team in Figma and trained users on new features.

IT & Systems Specialist — CarNow

Apr 2021 – Sep 2021 | Medellín · U.S. company

- Set up and supported the systems of a new U.S. company starting operations in Medellín: accounts, equipment, software and day-to-day user support.

Night Manager — The Charlee Hotel

Sep 2020 – Mar 2021 | El Poblado, Medellín

- Ran overnight operations of a boutique hotel as it reopened after the lockdowns: front desk, night audit, guest service, security and the hotel's systems.

Founder & General Manager — Own hospitality business

Oct 2013 – Mar 2020 | Medellín

- Founded and ran a short-term-rental and hotel operation with seven properties: Apartahotel Santo Tomás, Hotel La Castellana, Nutibara Home, Calasanz Home, Hostería Villa Claudia, Tu Apartamento and Conquistadores Home.
- Owned the whole business: operations, staff, finance and administration, brand and marketing, and distribution on Airbnb and Booking.com.
- Built the in-house booking and property-management system (Laravel, Bootstrap, JavaScript, MySQL) and the websites with live availability; ran the servers, backups and IT.
- In parallel, delivered web projects for small businesses: WooCommerce stores, multilingual WordPress sites (WPML) and integrations with Stripe, Twilio and Firebase.

Software Developer & IT — .NET — Aerolínea de Antioquia (ADA)

Feb 2011 – Jun 2013 | Medellín

- Developed and maintained the airline's ticket and route sales system in .NET (C#) and SQL Server, and fixed back-end data inconsistencies in ticket sales.
- Integrated sales with the DMS accounting system and built internal tools for operational reporting.
- Provided IT support: user help desk, equipment installation and troubleshooting.

Systems Support — Agenciauto

Jul 2013 – Sep 2013

- Short engagement in IT and systems support.

Night Auditor — Comfort Suites Laureles · San Joaquín · Sky Plus Best Western · Poblado Plaza

2010 – 2011

- Night audit, front desk and hotel systems across several Medellín hotels.

Receptionist → Night Auditor → Front Desk Manager — Affinity Aparta Hotel / EE Hoteles

2005 – 2010

- Six years across the group's properties (Affinity, Alcázar de Oviedo, Rodeo, Novelty Suites and others): reception, night audit, front-desk leadership and hotel systems.

SELECTED PROJECTS

- **Sedona Scapes Platform:** Direct-booking platform for a vacation-rental business — reservation engine, guest portal with e-signature, PayU payments, channel sync and an MFA back office. 723 DB + 165 E2E tests.
- **Cancha:** Real-time football marketplace: Android app (Expo), Hono API on Cloudflare Workers, PostGIS discovery, Wompi split payments and a reliability score.
- **Lead Engine:** Nightly lead sourcing, headless-browser enrichment and A+ to D scoring feeding an enforced CRM pipeline for a tourism company.
- **All Bookings 2.0:** Accommodation marketplace rebuilt from no-code into a typed monorepo: multi-tenant hosts, concurrency-safe bookings, Wompi webhooks and a ledger.
- **Smart Library:** Laravel + React library system with RBAC, Google SSO, an audit trail and a grounded AI assistant — live, with CI/CD.

EDUCATION

- Technical Degree in Software Analysis and Development — CENSA, 2022
- Computer Security Technician (Risk Analysis) — Fundación Carlos Slim, 2021
