PROFILE

Senior full-stack developer and technical lead with 15+ years in software and IT — and 20+ years of work that includes founding and running my own hospitality business. I take products from an empty repository to production — architecture, backend, frontend, mobile, payments and infrastructure — and build the AI-assisted automation around them. Hands-on with PHP/Laravel, React/TypeScript, Node.js, Python, PostgreSQL, AWS, Azure, Cloudflare, Docker and Terraform. Having run a business end to end, I build with operations, customers and margins in mind. Bilingual English/Spanish, used to remote work with international teams.

- Founded and ran a 7-property hospitality business (2013 – 2020): operations, brand, marketing, finance and its own booking system
- Wompi, PayU and ePayco payments behind one pattern: signed webhooks, idempotency and an append-only ledger
- 8 systems documented as full case studies — architecture, workflows, data model — with 1,500+ automated tests
- AI-assisted bots and workflow automation in production on Slack, AWS and Cloudflare

EXPERIENCE

Founder & Technical Lead · GWork Systems

2026 - Present

Medellín · Remote — Own practice — software, AI automation, cloud & security

- Design and build production platforms end to end: a direct-booking hospitality platform (Sedona Scapes), a real-time sports marketplace with an Android app (Cancha), a marketplace rebuild (All Bookings 2.0) and a B2B lead-intelligence engine.
- Integrated Wompi, PayU and ePayco behind provider-neutral adapters — hosted checkout, signed and deduplicated webhooks, append-only ledger and reconciliation; no card data touches the platforms.
- Run an AI-augmented delivery process: architecture decision records first, coding agents inside automated gates (types, lint, unit, DB, E2E, accessibility, CSP), human review and staged releases.

Next.js · TypeScript · Hono · Cloudflare Workers · PostgreSQL / PostGIS · Expo / React Native · Python · Laravel

IT Manager — IT & Internal Systems · indie.io

May 2026 - Sep 2026

Remote

- Owned internal systems and platform operations across AWS and Cloudflare: internal applications, access, DNS, Workers, infrastructure-as-code and day-to-day technical operations.
- Built AI-assisted bots and operational automations for Hive/Slack workflows, integrating LLM/API services, PostgreSQL-backed tools and serverless components for intake, task routing and access lifecycle.
- Led staged platform migrations and integrations — including community/Discord workflows and internal tooling — across sandbox, staging and production with Terraform, Docker, GitHub CI/CD, E2E validation, approval gates, audit evidence and rollback plans.

AWS · Cloudflare · Terraform · Docker · PostgreSQL · Slack · LLM APIs · GitHub Actions

Full-Stack Developer — WordPress (Contract) · Major Media

2026 · several months

Remote · concurrent project

- Full-stack development for an agency's client sites: custom WordPress themes and plugins, integrations, performance and maintenance.

WordPress · PHP · JavaScript · Performance

SKILLS

FULL-STACK

PHP / Laravel / Symfony · React / Next.js · TypeScript · Node.js / Hono · Python / FastAPI · React Native / Expo · REST APIs · WordPress

CLOUD & PLATFORM

AWS · Azure · Cloudflare Workers / Pages / R2 · Docker · Terraform · GitHub Actions / CI/CD

DATA

PostgreSQL / PostGIS · MySQL · MongoDB · SQL Server · Azure Data Factory · Databricks

AI & AUTOMATION

LLM API integration · AI-assisted bots · Grounded assistants · Zapier / HubSpot / GoHighLevel · Scrapers & schedulers

PAYMENTS & INTEGRATIONS

Wompi · PayU · ePayco · Stripe · Webhooks & idempotency · OAuth / SSO

Full-Stack Developer & API Technical Writer · Fiserv
Jan 2026 – Apr 2026

Remote

- Supported the Vision Next platform with developer-facing technical and API documentation for financial-system workflows.
- Analyzed REST APIs with Swagger/OpenAPI, documenting endpoints, authentication, request/response models, status codes and error handling.

REST APIs · Swagger / OpenAPI · Markdown · Docs-as-code

Provisioning Manager — IT Infrastructure & Access · Steward
Nov 2023 – Nov 2025

Remote

- Managed IT provisioning and access across Google Workspace, Okta and MDM for macOS and Windows fleets.
- Built internal React/Node.js dashboards to monitor resource allocation and supported AWS cloud infrastructure initiatives.
- Authored SOPs, trained staff and coordinated provisioning, infrastructure and access-management processes across teams.

Google Workspace · Okta · MDM · React · Node.js · AWS

Full-Stack Developer & Team Lead · Virtual Latinos
Jan 2025 – Jun 2025

Remote · concurrent project

- Led full-stack delivery with React, Redux, TypeScript, Laravel and PostgreSQL for the virtual-assistant management and recruitment platform.
- Built and optimized REST APIs and automated operations through HubSpot, Zapier and GoHighLevel — lead pipelines, follow-ups, forms and calendars — reducing manual workload by 40%.
- Ran sprint planning, code reviews and mentoring; documented APIs and processes in Confluence, Swagger and Notion.

React · Redux · TypeScript · Laravel · PostgreSQL · HubSpot · Zapier · WordPress

SEO Specialist & Web Developer (Contract) · U.S.-based staffing company
Jul 2024 – Oct 2024

Remote · concurrent project

- Delivered SEO-focused WordPress and HTML/CSS/JavaScript sites with schema markup, Google Analytics, Search Console and Meta Pixel conversion tracking.
- Built custom plugins for lead automation and CRM integration, and handled server administration (cPanel, Linux), performance and production support.

WordPress · JavaScript · Technical SEO · Google Analytics · Linux

IT Specialist & Developer · SouthDesk
May 2023 – Oct 2023

Remote

- Supported business IT systems and day-to-day operations: user support, systems administration and troubleshooting.
- Built and maintained the company's responsive, conversion-focused website alongside other development tasks.

IT support · Systems administration · WordPress

IT Specialist & Systems Integrator · Abatech
Jul 2022 – Apr 2023

Medellín

- Managed hybrid infrastructure across Azure and on-premises servers; automated maintenance with Python and Bash.
- Led Docker containerization and CI/CD pipeline setup, and implemented cybersecurity protocols and risk assessments.

Azure · Docker · CI/CD · Python · Bash · Security

SYSTEMS & SECURITY

Okta · Google Workspace · MDM · RBAC / MFA · CSP / HSTS · Risk analysis

BUSINESS & OPERATIONS

General management · Hotel operations · Airbnb / Booking.com · Team leadership · Brand & marketing · Administration & finance

DELIVERY

Swagger / OpenAPI · Technical writing · Agile / Scrum · Code review · Mentoring · Jira / Confluence / Notion

LANGUAGES

Spanish — Native

English — Professional (C1)

EDUCATION

Technical Degree in Software Analysis and Development
CENSA · 2022

Computer Security Technician (Risk Analysis)
Fundación Carlos Slim · 2021

CERTIFICATIONS

Web Scraping with Python and XPath
Fundación Carlos Slim · 2023

Front End Developer
Fundación Carlos Slim · 2022

Cloud Computing Fundamentals
Fundación Carlos Slim · 2022

PHP Programming with MySQL Database
Politécnico Superior de Colombia · 2022

Database Administrator
Fundación Carlos Slim · 2021

+12 more (SENA, Fundación Carlos Slim) — full list in the ATS and Word versions.

Software Analyst, Developer & UX Collaborator · **UNIFI BPO** Oct 2021 – Jun 2022
Medellín

- Built internal web applications with React, FastAPI and MySQL that improved process efficiency.
- Wrote technical requirements and Swagger API documentation, designed UI components with the design team in Figma and trained users on new features.

React · FastAPI · MySQL · Swagger · Figma

IT & Systems Specialist · **CarNow** Apr 2021 – Sep 2021
Medellín · U.S. company

- Set up and supported the systems of a new U.S. company starting operations in Medellín: accounts, equipment, software and day-to-day user support.

Night Manager · **The Charlee Hotel** Sep 2020 – Mar 2021
El Poblado, Medellín

- Ran overnight operations of a boutique hotel as it reopened after the lockdowns: front desk, night audit, guest service, security and the hotel's systems.

Founder & General Manager · **Own hospitality business** Oct 2013 – Mar 2020
Medellín — Own business — closed when the pandemic shut down tourism

- Founded and ran a short-term-rental and hotel operation with seven properties: Apartahotel Santo Tomás, Hotel La Castellana, Nutibara Home, Calasanz Home, Hostería Villa Claudia, Tu Apartamento and Conquistadores Home.
- Owned the whole business: operations, staff, finance and administration, brand and marketing, and distribution on Airbnb and Booking.com.
- Built the in-house booking and property-management system (Laravel, Bootstrap, JavaScript, MySQL) and the websites with live availability; ran the servers, backups and IT.
- In parallel, delivered web projects for small businesses: WooCommerce stores, multilingual WordPress sites (WPML) and integrations with Stripe, Twilio and Firebase.

Laravel · MySQL · JavaScript · WordPress · Airbnb / Booking.com · Operations · Marketing

Software Developer & IT — .NET · **Aerolínea de Antioquia (ADA)**
Feb 2011 – Jun 2013
Medellín

- Developed and maintained the airline's ticket and route sales system in .NET (C#) and SQL Server, and fixed back-end data inconsistencies in ticket sales.
- Integrated sales with the DMS accounting system and built internal tools for operational reporting.
- Provided IT support: user help desk, equipment installation and troubleshooting.

C# · .NET · SQL Server · DMS integration · IT support

EARLIER EXPERIENCE — HOSPITALITY & IT (2005 – 2013)

Systems Support · **Agenciauto** Jul 2013 – Sep 2013
Short engagement in IT and systems support.

Night Auditor · **Comfort Suites Laureles · San Joaquín · Sky Plus Best Western · Poblado Plaza**
2010 – 2011
Night audit, front desk and hotel systems across several Medellín hotels.

Receptionist → Night Auditor → Front Desk Manager · **Affinity Aparta Hotel / EE Hoteles**
2005 – 2010
Six years across the group's properties (Affinity, Alcázar de Oviedo, Rodeo, Novelty Suites and others): reception, night audit, front-desk leadership and hotel systems.

SELECTED PROJECTS

Architecture, workflows and data models for each one are in the portfolio.

Sedona Scapes Platform
Direct-booking platform for a vacation-rental business — reservation engine, guest portal with e-signature, PayU payments, channel sync and an MFA back office. 723 DB + 165 E2E tests.

Cancha
Real-time football marketplace: Android app (Expo), Hono API on Cloudflare Workers, PostGIS discovery, Wompi split payments and a reliability score.

Lead Engine
Nightly lead sourcing, headless-browser enrichment and A+ to D scoring feeding an enforced CRM pipeline for a tourism company.

All Bookings 2.0
Accommodation marketplace rebuilt from no-code into a typed monorepo: multi-tenant hosts, concurrency-safe bookings, Wompi webhooks and a ledger.
