Senior Full-Stack & AI Automation Engineer

Cloud · APIs · Data · Platform Engineering

Senior Full-Stack Developer | AI Automation | Cloud & APIs with 10+ years across software development, IT systems, cloud operations, and automation. Builds full-stack applications with React, TypeScript, and REST APIs, backed by Node.js and Laravel systems. Recent work spans AWS and Cloudflare platform engineering, DevOps practices, and practical LLM/API automation for real operational workflows.

CORE TECHNICAL SKILLS

Full Stack: React, TypeScript, JavaScript, Node.js, PHP/Laravel, Symfony

Cloud & Platform: AWS, Azure, Cloudflare, Docker, Terraform, CI/CD, GitHub Actions

Data: PostgreSQL, MySQL, SQL, Azure Data Factory, ADLS, Databricks

AI & Automation: LLM/API integration, Claude Code, AI-assisted engineering, REST APIs, webhooks, workflow automation

IT / Systems: Google Workspace, Slack, identity/access lifecycle, technical documentation, change governance

Additional: WordPress (theme/plugin development, WooCommerce)

PROFESSIONAL EXPERIENCE

indie.io | IT Manager / IT & Internal Systems

June 2026 – September 2026

- Owned internal systems and platform operations across AWS and Cloudflare (Workers, Access, DNS), supporting infrastructure for internal engineering tools.
- Built and maintained Terraform/Terraform Cloud infrastructure-as-code and Docker-based containerized services, with CI/CD delivered through GitHub workflows.
- Designed AI-assisted operational tooling, integrating LLM-powered services via API into PostgreSQL-backed internal platforms and dashboards.
- Automated identity/access-lifecycle workflows — onboarding/offboarding, Google Workspace, Slack, and developer-platform access — with approval gates and audit evidence.
- Applied production validation practices, including idempotency checks and rollback planning, as part of standard change governance for deployments.

Virtual Latinos | Full-Stack Developer

October 2024 – June 2025

- Led full-stack development (React, Redux, TypeScript, Laravel, PostgreSQL) for virtual-assistant management platforms, focused on performance and scalability.
- Automated operational workflows via Zapier and HubSpot integrations, reducing manual workload by 40%.
- Built and optimized RESTful APIs, improving backend-to-frontend data flow.
- Led sprint planning, code reviews, and mentoring; produced API documentation and process manuals (Confluence, Swagger, Notion).

Steward | Contractor, Provisioning Lead & Infrastructure Manager

January 2023 – June 2024

- Directed IT provisioning across Google Workspace, OKTA, and MDM for macOS/Windows environments.

- Built internal dashboards (React, Node.js) for resource-allocation monitoring.
- Led AWS cloud migration and infrastructure upgrades.
- Authored SOPs and process documentation; trained staff on new tooling.

Abatech | IT Specialist & Systems Integrator

July 2021 – November 2022

- Managed hybrid cloud infrastructure spanning Azure and on-premises servers.
- Built Python/Bash automation scripts for system maintenance tasks.
- Led Docker containerization initiatives and CI/CD pipeline setup.
- Implemented cybersecurity protocols and risk-assessment procedures.

ADDITIONAL RELEVANT EXPERIENCE

- **SEO Specialist & Web Developer (Contractor), U.S.-based staffing company** (Jul 2024 – Oct 2024): SEO-driven website delivery (HTML/CSS/JS, WordPress); backend/server management.
- **UNIFI BPO — Software Analyst, Developer & UX Collaborator** (Apr 2019 – Jul 2021): Web applications (React, FastAPI, MySQL); API documentation (Swagger); UI collaboration in Figma.
- **Freelance Software Developer & Consultant** (Feb 2017 – Apr 2019): End-to-end SaaS delivery (React, Node.js, Laravel, MongoDB); third-party integrations (Stripe, Twilio, Firebase).
- **Conquistadores Home, La Villa — IT Specialist, Full-Stack Developer & Team Lead** (Feb 2014 – Jan 2017): Custom booking/management systems (Laravel, Bootstrap, MySQL); led a small technical team.

EARLIER IT / SYSTEMS EXPERIENCE

Earlier roles included IT systems, software development, operational reporting, and systems administration across airline, hospitality, and logistics environments, including Aerolíneas de Antioquia (ADA), The Charlee Hotels, Two Cousins Trucking, and Novelty Suites S.A.

EDUCATION

- **Technical Degree in Software Analysis and Development** — CENSA, 2022
- **Computer Security Technician (Risk Analysis)** — Carlos Slim Foundation, 2021

SELECTED CERTIFICATIONS

- Front End Developer — Carlos Slim Foundation, 2022
- Cloud Computing Fundamentals — Carlos Slim Foundation, 2022
- PHP Programming with MySQL Database — Politécnico Superior de Colombia, 2022
- Database Administrator — Carlos Slim Foundation, 2021
- Web Scraping with Python and XPath — Carlos Slim Foundation, 2023

LANGUAGES

- Spanish — Native
- English — C2 (Professional Working Proficiency)
